Some words about the 'advancement assessment'. It's basically a communist phrase, used in various situations. Outstanding groups/individuals are given the title of 'advanced' and commended. In this chapter it's related to the one-child policy, where vasectomy was encouraged, or even required. (not any more as far as I know)

And by now the foreshadowing of the games arc is still on the way. This chapter may not be exciting but it's worth it (according to the author).

Chapter 18 has 32 pages, please wait with patience.

Lastly, don't forget to read from left to right.
